Dear Sir or Madam,

I am extremely pleased to recommend Michael for any professional position in program or project management. As Director of Business Operations at UCT, I was Michael's direct supervisor from 2009 – 2012. During this time we collaborated on several global scale projects that required coordination between multiple factories and I got to know Michael very well.

Michael's in depth knowledge of business and project management, combined with his innate feel for customer interaction was instrumental in the execution of multiple complex new product introductions in our factory. His technical acumen and focused drive were greatly respected by our customers as well as the operations and engineering staff he helped to coordinate. Michael has a natural ability to inspire confidence and motivate personnel that led to increased support and buy in from the teams he managed on demanding projects.

I can assertively say that his logical and thorough approach to challenges was key to the success of the accounts under his cognizance. Michael also maintained the highest level of customer satisfaction and project goal completion as compared to a group of 10 peers during his time at UCT.

For these reasons I am highly confident that Michael will be successful in any role allowing him to utilize his thorough and diverse skillset in project and business management.

Dave Myers

Director, Business Operations UCT
